

Classic Birdhouse with Mounting Bracket

Assembly Guide

Before You Start

You'll Need

- Super glue (CA glue) or a suitable hard plastic adhesive (*not included*)
- A clean, flat work surface

Estimated assembly time: 5–10 minutes

Important Information

- Read this guide completely before starting assembly.
 - Test-fit all parts before applying glue.
 - Apply only a **small amount of glue** where required.
 - Keep this guide for future reference.
 - Mounting screws for attaching the bracket to a fence, wall or tree are **not included**.
-

Step 1 – Install the Perch

Insert the perch into the designated hole from the **inside** of the birdhouse.

Push it firmly until it is fully seated and cannot move any further.

If the perch does not fit tightly, apply a **small amount of glue** before inserting it.

 **Photo:**

Step 2 – Install the Roof

Slide the roof onto the birdhouse from the top.

Ensure the roof is installed in the correct orientation:

- The **long roof overhang** faces the **front** (entrance side).
- The **short roof overhang** faces the **rear**.

The roof should slide smoothly into place.

 **Photo:**

Step 3 – Secure the Roof

Insert the **four locking pins** into the holes provided to secure the roof.

Do not use glue on these pins.

The locking pins are designed to keep the roof removable, allowing the birdhouse to be opened for cleaning whenever necessary.

Step 4 – Install the Mounting Bracket

Secure the mounting bracket to a suitable surface, such as:

- Wooden fence
- Wooden post
- Tree
- Wall

Always use screws suitable for the mounting surface.

Mounting screws are not included.

Step 5 – Attach the Birdhouse

Place the assembled birdhouse onto the mounting bracket.

From underneath, install the **four supplied 3D-printed thumb screws**.

Tighten them by hand until the birdhouse is securely attached.

Do not overtighten the thumb screws.

Assembly Complete!

Congratulations!

Your **Techro3D Classic Birdhouse** is now ready for outdoor use.

For the longest service life, we recommend installing the birdhouse in a sheltered location whenever possible.

Enjoy watching your garden visitors!

Techro3D

**Engineered with purpose.
Built to last.**
